

CASE STUDY

PLEASE BE SEATED

Please Be Seated, comprises of a series of rising and falling concentric circles, providing benches and arches for people to sit on and walk under. It is a collaboration between Arup and British designer, Paul Cockledge, to transform Finsbury Avenue Square at Broadgate, London with a large-scale community installation and was part of the annual London Design Festival.

The unique installation uses timber sourced from reclaimed scaffolding planks and galvanized steel scaffolding poles to bring focus to the reuse and repurpose of construction waste.

Having been moved from London's Broadgate, there are plans to re-erect the installation in a new location.

Learn more about galvanized steel and the circular economy

The galvanizing industry is moving forwards - keeping galvanized steel at the forefront of solutions for tackling climate change and delivering the circular economy.

Galvanized steel can provide innovative solutions that optimise durability and facilitate circularity of steel structures and components. These solutions can be easily implemented using this well-established and simple method of protecting steel.
